Gravity

Dean Brody

I've heard scientists get confused when you ask them to define it
'Cause it's a miracle
It keeps the universe we see from ever dying
And the stars from falling
Though we can't see it we know it must true
And it's the only thing I've found to compare our love to
It's invisible, you can't touch it
No matter where you go on Earth you can't outrun it
It only exists to pull you in till you're where you're meant to be
Yeah girl our love's a lot like gravity
It's a phenomenal how I can hunger for your touch
And need your company
And it's just beautiful how from across a crowded a room
Your eyes will follow me till our bodies meet

And when I'm not with you I feel a tug inside my heart
That's just never satisfied until I'm where you are
It's invisible, you can't touch it
No matter where you go on Earth you can't outrun it
It only exists to pull you in till you're where you're meant to be
Yeah girl our love's a lot like gravity, yeah
It's invisible, you can't touch it
No matter where you go on Earth you can't outrun it
It only exist to pull you in till you're where you're meant to be
Yeah girl our love's a lot like gravity
And I'm just never satisfied until you're next to me
