Sparks Fly

Tiffany Giardina

I know we're worlds apart
But thats what you keep saying
But I listened to my heart
That's why I keep staying
What is this game that we're playing when the rules are gone
Simply changing into dangerous but it could be so good
Sparks fly when we are together
Let em know why everythings better
Its a far cry from anything I've ever seen
Cause when we are together it's like matches and gasoline
I wish I may I wish I might
Thats what I keep saying
Our chemistry just feels so right
But stop this game we're playing
Got to finish what we started
Don't you leave me stranded broken hearted
It's so clear to see that was meant to be
Sparks fly when we are together
Let em know why everythings better

Its a far cry from anything I've ever seen
Cause when we are together it's like matches and gasoline
The sun keeps shining brighter
My hopes are flying higher
If we keep on trying theres nothing we can do
Its up to me and you
Yeah, yeah
Sparks fly when we are together
Let em know why everythings better
Its a far cry from anything I've ever seen

Sparks fly when we are together
Let em know why everythings better
Its a far cry from anything I've ever seen
Cause when we are together it's like matches and gasoline
Sparks fly when we are together
Let em know why everythings better
Its a far cry from anything I've ever seen
Cause when we are together it's like matches and gasoline
