

# Keeping Secrets

## Motor Ace

Took all week for the feeling to come.  
Dry your eyes we're staring at the sun.  
Want to call I've got nothing to say.  
Want it all got a line and the nerve to stay You're keeping secrets  
There's only one I need to find Shaking myself from the hum of the morning  
Saving it all for the rest of the night  
Losing myself to the drug of the city lights  
You're keeping secrets,  
There's only one I need to find. Said it all now there's no mystery.  
Talk so much I force myself to breathe.  
Underhand but it all went to plan  
Sold my soul to an understanding man You're keeping secrets  
There's only one I need to find Shaking myself from the hum of the morning  
Saving it all for the rest of the night  
Losing myself to the drug of the city lights  
You're keeping secrets,  
There's only one I need to find Stay up all night for the kids,  
It's getting better.  
Stay up all night for the kids,  
It's getting better You're keeping secrets  
There's only one I need to find Shaking myself from the hum of the morning  
Saving it all for the rest of the night  
Losing myself to the drug of the city lights  
You're keeping secrets,  
There's only one I need to find
