Relapse

Cool Ethan

Stop, static, it's a heart attack moment
Just let it just run its course
Can't you see this is just withdrawal
From the habit you have formed?Sweat it out, you'll be fine I'm sure
Take another sip
You know it always calms your nerves
Steal a glance, steal a glance
And I'll flash a smileIt's just the way I
I've always been and i always will be
Take my
Silence as this was wrong in the first placeConscience clear, it's a bad idea
But your lips don't make a sound
You escape in a warm embrace
And forget about this townRacing hearts near the finish line
Our getting caught is only just a matter of timeIt's just the way I
I've always been and i always will be
Take my
Silence as this was wrong in the first placeDon't say you lost me forever
Don't say you'll forget whatever
You said to make me second guess myselfDon't say you lost me forever
Don't say you'll forget whateverYour lips, they lie
His fists, my eyes
Just as our hips collide
In time for the reprise
All along, we're all aloneIt's just the way I
I've always been and i always will be
Take my
Silence as this was wrong in the first place
Wrong in the first place
