

# Used to the Pain

**Keith Urban**

And so I wrote this song for you  
I think I know just what you're going through  
Did you believe you'd never change?  
Nothin' ever stays the same I know it's hard holdin' on  
Even harder trying to let it go  
And so you're frozen like a stone  
But you are not alone [Chorus]  
Every step I take  
I get a little less afraid  
Of giving in to love, love  
Let it out  
Believe me when I say  
It gets better every day  
Once you get used to the pain What you hide inside I see  
There's a scar that's always gonna be  
There's a past in everyone  
You can't undo  
You can't outrun [Chorus: x2] Once you get used to the pain
