

Walk on Wire

Sir Cadian Rhythm

Falling, Falling
Falling through the dark, falling to the end of me
Falling, Falling
Falling through the dark, falling toward a better me
(I'm not alone, I'm not alone) I took a walk on wire
fell off before I reached
my ultimate desire
now I'm in the belly of the beast
Falling, Falling
Falling through the dark, falling to the death of me
Falling, Falling
Falling through the dark, falling toward a better me
Rise above the fire
If your severed heart unveils
A path that's straight yet dire
Tell a tale how "I" prevailed
Glasses up, here's to one thousand failures
Glasses up, here's to one thousand more
I knew the risk was worth the burn
If we didn't crash we'd never learn
Darkness grant me light
Give me strength to fight
There's a shortness of life
Stumble you'll be alright
You can forge a new light
Go on a venture on the line
Falling, Falling
Falling through the dark, falling to the end of me
Falling, Falling
Falling through the dark, falling toward a better me
(You're not alone, You're not alone)
