Don't Falter

Mint Royale

I used to feel so sad
And think too slow and drink too fast
Life had me blue and black
Till someone came and changed me backNow you see life
These colors shimmering around you
You must decide
To risk your heart for love to find youHey, don't falter
You know we ought to be together
Strange, I saw ya
I sorta knew it was for everPlease stay with me
And never miss a chance to kiss me
Babe, I love ya
When you're with me, it's always summerNow everything is fine
Because he is officially mine
And as long as we've got each other
It's gonna be officially summerYou're hypnotized
By these colors all around you
You must decide
To risk your heart for love to find youHey, don't falter
You know we ought to be together
Strange, I saw ya
I sorta knew it was for everPlease stay with me
And never miss a chance to kiss me
Babe, I love ya
When you're with me, it's always summerIt's only right
To have a little love around you
You must decide
To risk your heartHey, don't falter
You know we ought to be together
Strange, I saw ya
I sorta knew it was for everPlease stay with me
And never miss a chance to kiss me
Babe, I love ya
When you're with me, it's always summerHey, hey, don't falter
You know we ought to be together
Strange, I saw ya
I sorta knew it was for everPlease stay with me
And never miss a chance to kiss me
Babe, I love ya

When you're with me, it's always summer
