

Vogene

Oketo

Deep in Decay, I can feel you there
Tell me you care
Time, Gone away, holiday
It's over now, you see how
Grown away, gone astray
I will pray for the day when were alive, and it feels right
Were burning bright Disconnect, Recollect
Who am I? Who am I?
Resurrect from my head
Come to Life, come to life I want to Grow old with You
Want to take time, want to have all of you
But where is your love? Where is your heart now?
Wish to dream I spare the time it takes to get to you Sober sadness, drunken madness
I have changed my ways
Keep us healthy, make us happy
Fill the flaws with greed
Come back to where we were at
It was never over, you thought love would make us sober
Now you're gone
