Problem

Remy Zero

Inside you feel so tired
Your minds move too fast
Until you're knocked back on the ground
Feelings that linger around
Summer here and the sun will find you
Falling out with the world around you
But you need not run away
'Cause every thing's bound to change
We could work this out or just let it go
It's time to learn what we should know
That's the problem with me, see, there's a problem with me
That's the problem, problem with me
So, now you're old and the world has left you
It's so sick, you see just where they kept you down
Locked up in fear, we can change it all from here

Simply let it disappear
We could work this out or just let it go
It's time we learned what we should know
That's the problem with me, see, there's a problem with me
And that's the problem
Fade out till tomorrow, you just keep standing there
Reelin' will follow spinning in the air
That's the problem with me, see, there's a problem with me
That's the problem
That's the problem with me, see, there's this problem with me
That's the problem, problem with me
All I wanted, all I wanted
All I wanted, all I wanted
