

Turn It Around

The Head and the Heart

Stand proud, stand strong
And allow the love and help that comes along
You know the richest man didn't build his house alone
The greatest lessons I learned, I learned right here at home
You know the feeling I'm talking about
Every woman and man without a doubt
You're down but not out
You can turn it around, turn it around
There's nobody blocking your way, taking you down
And if you think that you're lost, you can follow the bridges you've crossed
And then you'll be found
Stand proud, stand strong
And allow the love and help that comes along
You know without your love the light divides alone
Lessons I learned right here at home
You know the feeling I'm talking about
Every woman and man without a doubt
You're down but not out
You can turn it around, turn it around
There's nobody blocking your way, taking you down
And if you think that you're lost, you can follow the bridges you've crossed
And then you'll be found
You know the feeling I'm talking about
Every woman and man's been down and out
But you can turn it around
You can turn it around
You can turn it around
You can turn it around
Yeah, you can turn it around, turn it around
There's nobody blocking your way, taking you down
And if you think that you're lost, you can follow the bridges you've crossed
And if you think that you have lost all the version of feeling you saw
Just turn it around
You can turn it around
You can turn it around
You can turn it around
