Rotted Body Landslide

Cannibal Corpse

Climbing the mounds to escape from death
Ten thousand left to rot in this gorge
Bodies lie, putrefy, I won't dieSuffocating stench of corpse's waft
Up from the pits of deaths, fumes disgorge
Rancid heap, walls steep, vapors creepUnderneath, putrid tide
Rotted body, landslide, genocide
Mountains of dead mark the place where they died, they diedTransfixed with horror as the corpses fall
Flesh sloughs off as I try to grasp start to slip
Suffocate, corpses' weight steals my fateUnderneath, putrid tide
Rotted body, landslide, genocide
Anguish eternally fixed in their eyes
Rotted body, landslide
Avalanche of cadavers down the mountainsideSlide, genocide
Mountains of the dead mark the place where they died, they died
Bodies of the dead, smother me with rot
Remains are crushing me, decomposing moundThis is where I die
Nameless dead my witnessSlide, genocide
Anguish eternally fixed in their eyes
Rotted body, landslide
Avalanche of cadavers down the mountainside
