

# How The Day Sounds

Greg Laswell

Oh who would have ever known this?  
Could be this easy  
I was a long, long way off  
Then just like that it was over  
Everything I knew of love  
I was a long, long way off And I think I like how the day sounds  
Like how the day sounds through this new song Thank you for opening the window  
The sky is clear as my mind is now  
I was a long, long way off  
Join me in welcoming the sun in  
It's much brighter than the night I hid in  
I was a long, long way off And I think I like how the day sounds  
Like how the day sounds through this new song  
And I think I like how the day sounds  
Like how the day sounds through this new song From a long way down. Yeah, it's well worth the time that its  
taken to get here now  
Yeah, it's well worth the time that its taken to get here now Ba da dum... So go ahead and bang a gong  
Nothing can drown out the sound and the whisper of my love And I think I like how the day sounds  
Like how the day sounds through this new song  
And I think I like how the day sounds  
Like how the day sounds through this new song  
Through this new song  
Through this new song And the lines have all been drawn  
I know where I belong, where I belong,  
Where I belong  
And the lines have all been drawn  
I know where I belong  
Where I belong And I think I like how the day sounds  
Like how the day sounds through this new song  
And I think I like how the day sounds  
Like how the day sounds through this new song Oh, won't you sing along  
Oh, my love won't you sing along  
Oh, won't you sing along  
Oh, my love won't you sing along  
Oh, won't you sing along  
Oh, my love won't you sing along  
Oh, won't you sing along  
Oh, my love won't you sing along
