

The Messenger

The Black Delta Movement

Look around, give your eyes a new adventure

What you see is a mix of past and future

Your moment is coming

Hold on, hold on

How you gonna be when tell the story?

Everything we took, was it from each other?

Hold on, hold on

It's too late to get around it

Say goodbye to how we found it

This is what we least expected

Don't you put the blame on the messenger

I've seen the flames that lick at survival

Check your dreams into the Justice Hotel

Your moment is coming

Hold on, hold on

How you gonna be when tell the story?

Everything we took, was it from each other?

Hold on, hold on

It's too late to get around it

Say goodbye to how we found it

This is what we least expected

Don't you put the blame on the messenger

Hold on, hold on

How you gonna be when tell the story?

Everything we took, was it from each other?

Hold on, hold on

How you gonna be when tell the story?

Everything we took, was it from each other?

Hold on, hold on

It's too late to get around it

Say goodbye to how we found it

This is what we least expected

Don't you put the blame on the messenger

It's too late to get around it

Say goodbye to how we found it

This is what we least expected

Don't you put the blame on the messenger

It's too late to get around it

Say goodbye to how we found it

This is what we least expected
Don't you put the blame on the messenger
Come on
