

# Starfighters

## Funker Vogt

A dream finally came true  
To wear this special uniform  
To join in their company  
The best of the bestAlways been a believer  
In your own capacity  
The training never was too hard  
No one could break youReach out for the stars  
Your strong will got you here  
You walked a stony way  
Without the slightest sign of fearWe're starfighters, fly all day and all night  
And all that we see is our cockpit light  
We're starfighters and we love it so much  
It's our obsession, we have the master's touch
