Faces

We Shot The Moon

Live it up, let it go
Just hand over control
All the space and all the time
Yeah, it all just passed you by
You've been so many places
And I know the feel of wearing different faces
And if you slow down, could it ever be this fun?
In a small town with nowhere else to run
Give it time, figure it out, get in line and narrow it down
You'd go farther than you ever thought you could
And have you noticed this before
That you never close the door
Always keep them on the line
Save it for another time
You've been so many places
And I know the feel of wearing different faces
And if you slow down, could it ever be this fun?
In a small town with nowhere else to run
Give it time, figure it out, get in line and narrow it down
You'd go farther than you ever thought you could
I try to make us believe
The lies, the lies that you were doing everything you could
You've got a lot to change, it's not too late
You've got to bring it to the light and find the good
You've been so many places
You've been so many places
And if you slow down, could it ever be this fun?
In a small town with nowhere else to run
Give it time, figure it out, get in line and narrow it down
You'd go farther than you ever thought you could
(You've been so many places)
Farther than you ever though you could
(You've been so many places)
Farther than you ever though you could
(You've been so many places)
Farther than you ever though you could
