

Love Me Now

The Black Seeds

Don't be afraid, don't be afraid, to take a step closer babe
I can see it in your eyes, that I hurt you
And I know that sometimes, I can be poisonous
But I feel the time is right for us to get serious
 Serious, I'm ready
 Come on love me now,
 Come on love me now,
 Serious, yes I'm ready
 Come on love me now,
 Come on love me now,
And I can see you working so hard
 And it ain't easy
Just trying to stay on top make all those ends mean
 But we're in this together now
 And don't you forget it
 Think of all the plans we made
 You don't need to be afraid
 Come on love me now,
 Come on love me now,
 Serious, yes I'm ready
 Come on love me now,
 Come on love me now,
 Feeling all good, much older today
Yes I'm feeling that time is slipping away on you
 There's a fear and it grows, grows inside
 Yes it takes its toll
A fear that you could have done much better in your life
And now I understand we're just doing the best we can
I'm all the way with you, yes I'm all the way with you
 I'm ready, to get serious
 Come on love me now,
 Come on love me now,
 Serious, yes I'm ready
 Come on love me now,
 Come on love me now.
