

Time Of Your Life

[Ryan Calhoun](#)

Doesn't seem that far
The trip that I can take
Down memory lane

To much simpler days Away from all that surrounds me now As I'm getting older and things rarely slow down
It helps to remember you when days that I found
The things that enable me to get through these days
And all of the memories along the way Along the way And how time can pass
And how I can lose myself
When I get off track

Of much simpler days Away from all that surrounds me now As I'm getting older and things rarely slow down
It helps to remember you when days that I found
The things that enable me to get through these days
And all of the memories along the way Away from all that surrounds me now
Away from all that surrounds me now As I'm getting older and things rarely slow down
It helps to remember you when days that I found
The things that enable me to get through these days
And all of the memories along the way As I'm getting older and things rarely slow down
It helps to remember you when days that I found
The things that enable me to get through these days
And all of the memories along the way Along the way
