

Historical Force Feed

Destruction

Biased till the last day
Till the day I have to die
To overcome the legacy
And asked my self - why? Seeking for the truth that hides in the shady past
Our frightful past tense leads to the typecast I've spoken out - accused and worried
Fucking bleed - historical force feed
I've been accused - without a deed
Sickening - historical force feed Damned a before I could say knife
Cause of my breed
Statue - bared infamous action
By the dead and buried Banning my tribe's past isn't a solution
We all know the bloody truth, e pay our contribution Could I blame you for a committed crime of your kinship?
Do you think the son of a criminal desrves to get the whip? We don't want to wash off the blood on our nations
hands
But don't sentence someone for his roots Take a chance!
