

# Life Marches On

## Live

In the country that forms in the orchard swell  
With oranges and peaches a little bit of truth as well  
In the city politicians beat their drum  
All the suits come a runnin' it's our degeneration  
Life marches on  
Life marches on  
Life marches on  
In the country everybody thinks we're dumb  
We built the fire, why'd you come and get you some  
In the city skyscrapers touch the sky  
What's the use in being so higher when it's only gonna bring you down  
Life marches on  
Life marches on  
Life marches on  
  
In the country stars shine brighter than in the city  
In the country, in the country  
In the city I turn on the radio  
Only leaves me down with the question  
What happened to our generation?  
Life marches on  
Life marches on  
Life marches on, yeah, yeah  
Life marches on, yeah  
Life marches on  
Life marches on  
Life marches on  
Life marches on
