

# Are Ya With Me

James Otto

Oh yeah

Everybody's looking for somebody they could call their own  
Nobody wants to go walking through this world alone  
I can see you and me together, all tangled up and beautiful forever  
My heart's all wound up and waiting to go, yeah  
So tell me are you with me? Honey, do you feel me?  
Looking for a lover to come along and heal me  
Someone to take me higher, fill me with desire  
Set me on fire every time they kiss me, tell me are you with me?  
I might be wrong but I swear you're feeling it too  
In this situation there's only two things we can do  
We could walk away, pretend this never happened, tap right in to the deep kind of passion  
Long lonely nights are the only things we got to lose  
So tell me are you with me? Honey, do you feel me?  
Looking for a lover to come along and heal me  
Someone to take me higher, fill me with desire  
Set me on fire every time they kiss me, tell me are you with me?  
Are you with me here? Do you feel me?  
Darling, are you ready for the real thing?  
It's the real thing  
Tell me are you with me? Honey, do you feel me?  
Looking for a lover to come along and heal me  
Someone to take me higher, fill me with desire  
Set me on fire every time they kiss me  
Tell me are you with me? Can I get a witness?  
Have you ever had another love quite like this?  
Tell me are you with me? Tell me are you with me?  
Tell me are you with me? Tell me are you with me?
