Move to Work

Fine Young Cannibals

I'm not asking for advice
Don't tell me sacrifice
It's not the way I want
The choice, I haven't got
It's a case of doing something
I face the man and lose a lot...
Nothing seems to change, every town I turn to
Story is the same up and down the country
So, don't tell me "sacrifice."
I've got to move to work
I know what love is like
I've got to move to work
Oh, and it puts such a strain on us
On you and me my love
I wish there was another way for us
For you and me and my love
If I miss this train, there won't be another
If I get delayed, they'll say "don't you bother"
Here I go back again
You know I wanna stay, I know you've got to eat
Farewell until the weekend love
You've got lots of friends that we've haven't seen for weeks.
All I wanna do, is stay with you
I've got to move to work
There's no money, in this town
I've got to move to work
Wait 'til I got everything I want
Wait 'til I got everything I need
If you keep faith in me darling
It will make this, make this easier
All I wanna do, is stay with you
I've got to move to work.
