

# Move to Work

## Fine Young Cannibals

I'm not asking for advice  
Don't tell me sacrifice  
It's not the way I want  
The choice, I haven't got  
It's a case of doing something  
I face the man and lose a lot...  
Nothing seems to change, every town I turn to  
Story is the same up and down the country  
So, don't tell me "sacrifice."  
I've got to move to work  
I know what love is like  
I've got to move to work  
Oh, and it puts such a strain on us  
On you and me my love  
I wish there was another way for us  
For you and me and my love  
If I miss this train, there won't be another  
If I get delayed, they'll say "don't you bother"  
Here I go back again  
You know I wanna stay, I know you've got to eat  
Farewell until the weekend love  
You've got lots of friends that we've haven't seen for weeks.  
All I wanna do, is stay with you  
I've got to move to work  
There's no money, in this town  
I've got to move to work  
Wait 'til I got everything I want  
Wait 'til I got everything I need  
If you keep faith in me darling  
It will make this, make this easier  
All I wanna do, is stay with you  
I've got to move to work.
