

# Somewhere In the Swamps of Jersey

## Lifetime

I keep on laughing and you're keeping track and tonight I'll go back to the place I first knew that I'd wait for  
you always on streets and in doorways where engines they die near the northeastern line and you mentioned a  
record that reminded me of a week that you couldn't get things out of your head I'm truly sorry I missed that  
night it could have been the best time but it's just timing she showed up unexpected and I the train into town I  
put my collar down and pushed through the door but if it's smiles you want talk to the kid with the boy eyes and  
wake up dreaming next to him
