

Stormy Weather

Echo & the Bunnymen

I hope you are feeling better now
I hope you got my letter how
Is my stormy weather now
This ain't gonna change It would be like everyone
Pretending there is nothing wrong
Remember when we walked and talk
'Cause it never rained And it needed more than love
And love is more than life
And I want those stars above
To shine this night Feeling better wonder why
Acting that you laugh and cry
Eclipsing early summer sky
Somethings never change And it needed more than love
And love is more than life
And I want those stars above
To shine this night You want it you got it
There's nothing is chained down
You need it
I'll steel it
Just put your name down
I'll put my name down I hope you are feeling better now
I hope you got my letter how
Is my stormy weather now It had to be like everyone
Pretending there is nothing wrong
Remember when we walked and talk...
'Cause it never rained
It ever clog my spring And it needed more than love
And love is more than life
And I want those stars above
To shine this night You want it you got it
There's nothing is chained down
You need it
I'll steel it
Just put your name down
I'll put my name down You want it you got it
Now I know it is to you I'm bound
You need it
God speed it
Just put your name down

I'll put my name down How's the stormy weather now
