

# With This Heart

## Kansas

Don't you fear the darkness  
I am here to guide you with this hand  
Listen, feel the vibration  
I am here to lift you with this voice Don't be afraid  
The tears you have will all fade away  
What you are  
Will always be within your heart Don't doubt the strength you have deep within  
You can move any mountain with your hand  
Scream out, let the Heavens hear  
You can reach the stars with your voice  
Don't be afraid  
The tears you have will all fade away  
What you are  
Will always be within your heart Listen to the silence  
There are answers in the void of sound  
Your faith can open your heart from within  
There's a warmth that shines from your soul  
Don't be afraid  
The tears you have will all fade away  
What you are  
Will always be within your heart  
Don't be afraid  
The tears you've shed have shown you the way  
What you are  
Will always be within your heart With this heart  
With this heart  
With this heart
