

# Feel the Fire

Joe McElderry

Down in the basement  
There's a light that shines  
Escape to the city  
Where we know we can be saved When we feel like this  
It is deep inside  
With the joy it brings  
When we feel alive And it's all or nothing  
Gonna be alright  
Chasing good times  
Into, into the night Do you feel like me?  
Can you read my mind?  
It's getting close  
'Cause something's got me  
Burning up inside When you feel the fire  
Running through your veins  
When the heat gets higher  
And you can't and you can't be tamed Like a burning sun  
We are the chosen ones to  
Dance the night, dance the night  
When you dance the night with me (Dance with me)  
Imagination  
(Dance with me)  
Can drive you wild  
(Dance with me) The elevation  
(Dance with me)  
Can save and take you high  
(Dance with me) When we feel the light  
(Dance with me)  
It is deep inside  
(Dance with me)  
With the joy it brings got me  
Starting up tonight When you feel the fire  
Running through your veins  
When the heat gets higher  
And you can't and you can't be tamed Like a burning sun  
We are the chosen ones to  
Dance the night, dance the night  
When you dance the night with me Feel the music and you can't resist  
Feel the music and you can't resist

Feel the music and you can't resist  
Feel the music and you can't resist When you feel the fire  
Running through your veins  
When the heat gets higher  
And you can't and you can't be tamed Like a burning sun  
We are the chosen ones to  
Dance the night, dance the night  
When you dance the night with me When you feel the fire  
Running through your veins  
When the heat gets higher  
And you can't and you can't be tamed Like a burning sun  
We are the chosen ones to  
Dance the night, dance the night  
When you dance the night with me
