Got Dynamite

Demi Lovato

I can't take your hand and lead you to the water
I can't make you feel like you don't feel
But you know you wanna
Find out how to crack me, log in, try to hack me
Underneath the surface there's so much you need to know
And you might feel like you're drowning but that's what I need to let go
Tell me what you got to break down the walls
You just might need dynamite
Tell me what you got to break down the walls
Kick senseless my defenses
Tell me what you're gonna do
I need you to light the fuse
Tell me what you got to break down the walls
You just might need dynamite, got dynamite?
I can't paint this picture just so you can hang it
I can't wait for you to understand
If you just don't get it
Find out how to crack me, log in, try to hack me
Underneath the surface there's so much you need to know
And you might feel like you're drowning but that's what I need to let go
Tell me what you got to break down the walls
You just might need dynamite
Tell me what you got to break down the walls
Kick senseless my defenses
Tell me what you're gonna do
I need you to light the fuse
Tell me what you got to break down the walls
You just might need dynamite
When the walls come crashing down
I hope you're standing right in front of me
When my past lies all around
'Cause all you need to save me is to intervene
And make the walls come crashing down
Got, got dynamite?
Tell me what you got to break down the walls
You just might need dynamite
Tell me what you got to break down the walls
Kick senseless my defenses
Tell me what you're gonna do

I need you to light the fuse
Tell me what you got to break down the walls
You just might need dynamite, got dynamite?
Got dynamite? Got dynamite? Got dynamite?
