

What Would You Do

The Living End

I don't know enough about the things you do
I don't know enough to say, I really know you
But I already fell in love with you
And if you knew, what would you do? I can tell a lot by the things you wear
I can tell you're gonna be a millionaire
But I already fell in love with you
And if you knew, what would you do? I've stopped myself from trying
I should've talked to you
And now inside I'm dying
What would you do? I don't know enough about the things you do
I don't know enough to say I really know you
But I already fell in love with you
And if you knew, what would you do? I've stopped myself from trying
I should've talked to you
And now inside I'm dying
What would you do? I don't know enough about the things you do
I don't know enough to say, I really know you
But I already fell in love with you
And if you knew, what would you do?
What would you do? What would you do? What would you do?
