

A Little Warm Death

Cassandra Wilson

A little warm death
A little warm death wont hurt you none
Come on relax with me
Let me take away your physicality One little warm death comin' up
One little warm death with me tonight A little sweet death
One little cherry breathless mist
Feels like eternity
There's nobody here, just you and me One little warm death comin' 'round
One little sweet death with me tonight In and out of stages
Like the fazes of the moon
It can shine so brightly
Let the fullness soon, come soon, come soon But now I feel you near me
See you much more clearly
I can hardly wait to
Feel you movin' through my world, oh my world
Isn't deep without you One little warm death, come have one
One little warm death, come have one
One little warm death, come have one
Little warm death with me tonight In and out of stages
Like the fazes of the moon
We can shine so brightly
Let the fullness soon, come soon, come soon But now I feel you near me
See you much more clearly and
I can hardly wait to
Feel you movin' through my world, oh my world
Isn't deep without you One little warm death, come have one
One little warm death, come have one
One little warm death, come have one
One little warm death with me tonight Lie in my arms tonight
Lie in my arms tonight
Don't, don't, don't be afraid
Don't be afraid
Don't, don't be afraid
I'll never hurt you
I Love you
One little warm death
Don't one
One little warm death
Don't one One little warm death, come have one

One little warm death with me tonight
One little warm death, come have one
Little warm death with me tonight
One little warm death, come have one
One little warm death with me tonight
