

Just One Day

Anything Box

Walking in the morning winds, I stare up at the clouds
Slowly bring myself to rest near a peaceful plain
Hoping and waiting for some sign, anything will do
I just wander in my soul in the search for you You would say, "Please, please just go away
And let your mind forget about this dreary day"
Just one day in the life of a fool, just one day in the life of a fool The afternoon will pass me by as I reach the
wall
That stretches out across the land that I knew so well
And in a garden there all the flowers bloom
Reminders of a growing rose always full of thorns You would say, "Please, please dont cry this way"
Slowly turn as the moon shows her face
Just one day in the life of a fool, just one day
In the life of a fool, in the life of a fool, in the life of a fool Darkness drapes itself on me as Im heading home
Carrying roses in my hands, Im thinking of you
How you smiled and kissed my face
Thought I heard you, I thought I heard you say Just one day in the life of a fool, just one day in the life of a fool
Just one day in the life of a fool, just one day in the life of a fool
Just one day, just one day in the life of a fool
Just one day in the life of a fool, just one day
