

Share Your Love

Club Nouveau

share your love with me Ain't it a shame for two sitting all alone waiting for each other to say I do, I do love you,
and ain't it a shame for two missing out on love, cause they never gave enough of love, respect the things to....

hold on to Hold on love, I never give up

I'm down on my knees, I am begging you please, wont you come back to me Come baby, come on, come share
your love

share your love, you got to share your love, share your love with me

Come baby, come on, come share your love

Share your love, you got to share your love, share your love with me Ain't it a shame for two running from the
pain never giving on the love they had, inside their hearts, instead they run away

And ain't it a shame for two trying to hurt each other, feeling love to another, just two , cause babe inside their
hurt, the games they play Hold on love, I never give up

I'm down on my knees, I am begging you please, wont you come back to me Come baby, come on, come share
your love

share your love, you got to share your love, share your love with me

Come baby, come on, come share your love

Share your love, you got to share your love, share your love with me Ain't it a shame for two missing out on
love, cause they never gave enough of love, respect the things to, hold on to

And ain't it a shame for two trying to hurt each other, feeling love to another, just two , cause babe inside their
hurt, what should they do Hold on love, I never give up

I'm down on my knees, I am begging you please, wont you come back to me (ME) Come baby, come on, come
share your love (ohhhhhh.. won't you come back)

share your love, you got to share your love, share your love with me (yeah)

Come baby, come on, come share your love (Come on back to me)

Share your love, you got to share your love, share your love with me (Come share your love) Hold on Love, I
never give up

I'm down on my knees, I am begging you please, wont you come on back to me Come baby, come on, come
share your love (oh won't you come on back me)

share your love, you got to share your love, share your love with me (yeah come and share your love)

Come baby, come on, come share your love....(Come and share your love with me)

Share your love, you got to share your love, share your love with me (ooooohhhhhhhh) Repeat x2
