

# I Found the F

## Broadcast

I found the fragrance separate from the flower  
In all the logic I was lost  
I found the fair light blossom to be sour  
And beneath the soil the real cost You can to me carelessly I am iris and the lense  
The bridge adjusting to the water, water, water, water  
The level inside will rise, a fallen monument lies A prism is only walls  
My arms will not be bars  
The well now is your support  
In auto suggested pathways you are caught You came to me carelessly I am iris and the lense  
The bridge adjusting to the water, water, water, water  
The level inside will rise, a fallen monument lies
