

# LONELY NIGHTS

## Nova Rockafeller

No more lonely nights  
For everybody that find's their way

Someone is lost  
For everybody who feels the fear  
I'll take half the pain that you hide

Inside

Chorus:

If it's meant for you, it won't pass you by,

Don't live your life on the line

Like a carousel, it'll turn around, so many times

We might change a bit, doesn't everyone,

Lost in the moment we find

And madness is right, when you're by my side,

No more lonely nights

So many words that I meant to say

Don't come out right

So many chances I have to take  
Girl if I've never told your before

Your beautiful

Chorus

Everytime that we kiss you take me breath away  
I could talk for the world but you can silence me  
I get lost in your arms when you're holding me

No more lonely nights

If it's meant for you, it won't pass you by

Chorus(
