

# The Dark

## Firehouse

The Dark by Firehouse You know the whole world is changing and it's moving so fast  
That today's innovations never seem to last  
You're just a digital slave with an email address  
Too much information only means more stress  
Welcome to the computer age  
You've got to have every machine that we make  
Stronger faster new and improved if you want to compete  
(check it out)  
'Till the next vest thing makes you obsolete  
Stay up to speed with technology or you will be left in the dark  
You better be afraid if you can't keep up it'll be too late  
And you will be left in the dark  
They can always page you or call you on your cellular phone  
There's no way you can hide the won't leave you alone  
Cd-rom to Dvd, vinyl Lp to mp3  
Welcome to the computer age  
You've got to have every machine that we make  
Stronger faster new and improved if you want to compete  
(check it out)  
'Till the next best thing makes you obsolete  
Stay up to speed with technology or you will be left in the dark  
You better be afraid if you can't if you can't keep up it'll be too late  
And you will be left in the dark
