

# The Loop

## Deptford Goth

Try to picture yourself on the world  
In the world within the universe  
Spinning  
You were here don't let life push you out  
In the end what's going on up there? It's bigger  
It's okay if we're afraid  
When the light begins to fade  
Darkness, takes over  
And it all was here before  
And we'll all be here some more  
Goes up, and then down  
Maybe we're dead  
Maybe it's paradise  
Maybe we're saved  
And just haven't realized  
What we know is we don't know  
Is any of this happening?  
At least it got close  
At least we got close Even if it's an imagined state  
And we're acting in a foreign film  
It's better  
Never having had those echo dreams  
Rip them back into our conscious nerves  
Forever  
It's okay if we're afraid  
When the light begins to fade  
Darkness, takes over  
And it all was here before  
And we'll all be here some more  
Goes up, and then down Find a way  
Find a way back and remember it when we're doing it again  
On my paint underneath of the look  
On repeat, and not even a look Maybe we're dead  
Maybe it's paradise  
Maybe we're saved  
And just haven't realized  
What we know is we don't know  
Is any of this happening?  
At least it got close

At least we got close Maybe we're dead

Maybe it's paradise

Maybe we're saved

And just haven't realized

What we know is we don't know

Is any of this happening?

At least it got close

At least we got close
