## **Ricochets**

## **Holly Valance**

When will you ever see? You're killing me with the things that you say

It's all so gritty

What am I to do and do

Am I to do or do

When will you ever see?

To let it beDon't cry

It just ricochets

Into another day

Into another day

Please try to have something to say

There'll be another day

There'll be another dayTake a look around

Your only down was the things that you say

Turn out that way

What can you ever do

What can you ever do

When no one's around

It's going downDon't cry

It just ricochets

Into another day

Into another day

Please try to have something to say

There'll be another day

There'll be another dayDragging me down I go my way

The ending's always near

Head underground again today

Be only you are here and Don't cry

It just ricochets

Into another day

Into another day

Please try to have something to say

There'll be another day

There'll be another dayDon't cry

It just ricochets

Into another day

Into another day

Please try to have something to say

There'll be another day

There'll be another day
