Is It Over

Jaya

Is it over, are you really over her
Is it over, or will you take her back again
If it's over you can let her memory in
Come on over, we'll let our love begin

You say you can't count the times that she's hurt you
And she's hurt you for the last time
Now you say I'm the one that you're needing
But is the need in your heart or just in your mind

Is it over, are you really over her
Is it over, or will you take her back again
If it's over you can let her memory in
Come on over, we'll let our love begin

You know that I'm yours for the asking
If you're really asking, for true love
Words can't express how I want you
Oh, how I want to believe you're giving her up

But is it over are you really over her
Is it over or will you take her back again
If it's over you can let her memory in
Come on over, we'll let our love begin

Is it over, come on over let our love begin
Is it over..
