

Time Goes By

Emily Linge

It feels like yesterday we spent time together
Yet we've been apart more like forever
When you were close at hand we could sing and play
We would jump off the edge in an off-hand way

Standing on the edge of time wondering what we left behind
Time goes by for you and I, the time goes by
Life is short can't you see, you and I were meant to be
Just hold on tight as time goes by for you and I

We followed a path meant to last forever
Didn't see the change in weather
Then the rain set in for you and I
It doesn't feel right we're a world apart now I've lost my way
You're so far away longing for that day

I won't forget the times that we shared together
Days full of life, no worry at all
We never knew that we would have to part so long
The world was a mess and incredible stress

Standing on the edge of time wondering what we left behind
Time goes by for you and I, the time goes by
Life is short can't you see, you and I were meant to be
Just hold on tight as time goes by for you and I

We followed a path meant to last forever
Didn't see the change in weather
Then the rain set in for you and I
It doesn't feel right we're a world apart now I've lost my way
You're so far away longing for that day

After all the time that we shared
Our memories remain in our hearts
Even if the world doesn't heal it won't change the way I feel
Nothing can break us apart

Standing on the edge of time wondering what we left behind
Time goes by for you and I, the time goes by

We followed a path meant to last forever
Didn't see the change in weather
Then the rain set in for you and I

It doesn't feel right we're a world apart now I've lost my way
You're so far away longing for that day
After all the time that we shared
Our memories remain in our hearts
