

# Trip

## Willy Baxter

Well if Hell is just a place down below  
Then tell me why should I go  
When I could just go back to California  
Just go back to California  
And if Heaven is just a place up in the sky  
Then tell me why should I go  
When I could drive my car to Colorado  
Drive my car to Colorado  
And if Dorothy and little Toto met the wizard because  
Well, they found a place called Oz  
Well I could pack my bags and fly to Kansas  
Pack my bags and fly to Kansas  
And if Paradise is just a place where I'm happy all the time  
Frolicking in the sunshine, oh and the peacefulness I find  
Well, it's sweeter than red wine  
Then I might as well stay here and love you  
Think I'll just stay here and love you  
So let the ocean swallow California  
The mountains fall in Colorado  
Let tornadoes rip through Kansas  
I'll just stay right here and love you  
Yeah, who needs California  
And it's way too cold in Colorado  
And Kansas, well it's too flat  
Yeah, I think I'll just stay here and love you  
And your amber waves  
I think I'll just stay here and love you  
What a trip that would be
