

# American Veins (Acoustic Version)

## Kingsfoil

Shake, shake, wake me up at daybreak, get me out the door  
I love this place but if I leave here I will love it more  
Cause I have felt the wheels inside my head  
Quit their spinnging as if mobile livings gone to bedGet it back, get it back,  
I have felt that feeling, I want that feeling back  
Get it back, get it back,  
I have felt that feeling, I want that feeling backCause I'm the blood running through the web  
of the highways and the roads, that we call american veinsShake, shake, wake me up when you can't drive  
another mile  
Sunset city limets, set your sights on something wild  
Cause I can feel the wheels inside my head  
Start their spinning I am blacktop living once againGet it back, get it back,  
I have felt that feeling, I want that feeling back  
Get it back, get it back,  
I have felt that feeling, I want that feeling backCause I'm the blood running through the web  
of the highways and the roads, that we call american veins  
The blood running through the web of the highways  
and the roads, that we call american veinsThese roads are like, these roads are like veins  
They're calling out, they're calling out my name  
Home has run it's course, now it just ain't the same  
I need a highway to heal my painCause I'm blood running, american veins  
The blood running through the web of the highways  
that we call american veins, american veins, american veinsThat we call american veins
