Need to Get By

Vaux

Slow it down
The pace.
Half past perfect
Half past tense
I have
Trouble
With all the little things
The bigger ones, the worse it becomes
It's hard to hold anything when i
Can't begin to feel my hands i
Half past perfect
Half past tense
Fast asleep
Forever yours
Just makes it,
Just makes it,
Just makes it so.
You're better off without me, i won't lie
But you're what i need to get by, i need to get by
It's the only thing that been keeping me alive.
And that's what i need to get by, i need to get by.
Sitting here in the waiting room at my side
And that's what i need to get by, i need to get by.
I'm falling apart
Still falling apart
I'm falling apart
Still falling apart
You're better off without me, i won't lie
But that's what i need to get by, i need to get by
Sitting here in the waiting room at my side
But that's what i need to get by, i need to get by.
Leave me here, i won't fight.
And that's what i need to get by, i need to get by.
