

Breathless (Remastered)

DIO

You said a single word
But no one really heard
Sometimes we scream alone It's always worse at night
When darkness kills the light
We're in the danger zone You wait with pounding heart
You know it's just the start Cause you're breathless, ready to burn
Breathless, willing to learn
Breathless, the circle still turns
You're breathless Living inside your mind
Who knows the things you'll find
There could be hell or rainbows But it's a funny thing
The more you feel the sting
You're just a leaf that the wind blows You've been this way before
One step and you're through the door And you're breathless, ready to burn
Breathless, the circle still turns
Breathless, willing to learn
You're breathless You said a single word
But no one really heard
Sometimes we scream alone
