

# The Lion Lair

## Bonnie 'Prince' Billy

I took road and said goodbye  
Friends go one way, I went mine  
I got lost then very quickly  
Started shaking, feeling sickly In the lion lair, in the lion lair  
Watch your own self and take care I am outside, almost one  
With all the life in the lion lair  
All alone and all around  
Canyon clept above the ground There was treeless flat around me  
And no evil came and found me  
In the lion lair, in the lion lair  
Watch your own self and take care I am outside, almost one  
With all the life in the lion lair Stars came out in midday burning  
Earth grumbled stones were churning  
Colors red were rocks and sky  
And powered glint infused the eye Had himself in no time  
Hand on shaft and gripped his ball  
Wished your mouth would come down on it  
Feel your lips sink warm upon it In the lion lair, in the lion lair  
Watch your own self and take care  
I am outside, almost one  
With all the life in the lion lair Beast and bird they called me kin  
Bathed me and they tucked me in  
Laid down on the forest ground  
Stars above, they shone on down In the lion lair, in the lion lair  
Watch your own self and take care  
I am outside, almost one  
With all the life in the lion lair In the lion lair, in the lion lair  
Watch your own self and take care  
I am outside, almost one  
With all the life in the lion lair
