

Bones Of Man (Live 1-Man Band)

Chad VanGalen

It was a beautiful night, yeah the moon was climbing out of the mountains.

And from the city in the ground came the sound of a million lights.

We were headed to the center of our brain when they came a'knocking.

They said we've seen you before, and we really like all of the stories. Ooh this world of wonder, we'll leave the bones of man, we never wanted to leave you. Ooh this world of wonder, we'll leave the bones of man, we never wanted to leave. When it touched my hand, I felt my mind open up like a valley.

Then from a crack in the ground came the sound of a million legs.

There was a silent flash before the earth started closing up on itself.

I felt at peace and alive even though the ship was going down. Ooh this world of wonder, we'll leave the bones of man, we never wanted to leave you. Ooh this world of wonder, we'll leave the bones of man, we never wanted to leave you.
