

# Water

## Dinosaur Jr.

I saw you down across the water  
You're floating safely in the way you do  
Then I scrambled before you saw me  
I've gotta keep thinking you wanted to By the shoreline, will you be fine?  
Or will it cover you?  
And when you taste it, will you embrace it?  
What will you let it do to you? Grab a look across the water  
We grab a smile and then you're gone a while  
With you it'd be across the water  
When I'm losing it, I like your style By the shoreline, will you be fine?  
Or will it cover you?  
And when you taste it, will you embrace it?  
What will you let it do to you? Come on, baby and drive me out of mind  
And mind if I come home along with you  
And see what you do This is crazy and nothing more I want to  
The sea is not the safest place to sit  
And be so spacy Scary things across the water  
You'd never know till they have their way with you  
You won't catch me dip in the water  
However much I want to play with you And don't stay in long  
No one's that strong enough, not to crumble  
Whenever the water wants you Don't be so crazed, I'm just tryin' to save  
You from losing everything you've got  
This is no time to rot Don't be fooled by all the coolness rushing by  
Don't let it grab your mind  
Pull out now or you will find All you strive for  
Nothing, gone, no more  
You're his servant now
