

Cold World

Dirty Dave Osti

it's a cold cold world waiting for you
living in the shadows watching what you do
hanging in the phone line listening to you
everyone is data see ya later
it's a cold cold world
looking at the news just another gunfight takin out some dudes
dressing little babies up in high heeled shoes
they did it for the money ain't it funny
it's a cold cold world, cold it's a cold cold world
living in your car knowing everybody knows exactly where you are
skid through a red light run round a bend
everyone is data see ya later
it's a cold cold world
somebody dies caught it through the camera see the look in their eye
zoom in on slo-mo frame by frame
get it in the paper did he rape her
it's a cold cold world, it's a cold cold world. I can't believe it why don't they leave us alone?
now who's the heathen were barely breathing on our own. It's a cold cold world
how do you do, would you like to help us with a dollar or two?
looking at your profile I see you like the Blues
everyone is data see ya later it's a cold cold world
it's a cold cold world, cold.
