

# Through Black Holes

eventide

Eyes wide open in here  
Sensing there's something wrong with me  
and with the room they've put me into  
I try to fall asleep when there's no really need to breathe  
How come I ended up alone?  
absent, forgotten, slowly withering away  
wither away, wither away I  
wither away, wither  
through black holes I stray  
eyes go blind in here  
wither away, wither away I  
wither away, wither  
through black holes I stray
