Mechanical Babylon

Septic Flesh

[Music: Spiros A., Lyrics: Sotiris V.]A malfunction to the machine
She chews its screws of sanity
Loosing parts of human seed
As she lusts for electricityPlastic attitude Gray emotions
Wear your cables and join with me
Boring lives in entropy
Incorporeal surgeryEnvironmental therapy for the genes that threat security
A new breed of mass murderers
Instructed from their parents to do the taskMechanical our whore BabylonThe old hag looks so young in her dress of silicon
A jungle in her heart made from concrete, glass and metalMechanical our whore BabylonHer kiss of methadone is a drug that steals control
She wants clockwork toy
disconnected from the physicalPlastic attitude Gray emotions
Wear your cables and join with me
Boring lives in entropy
Incorporeal surgeryMechanical our whore BabylonThe old hag looks so young in her dress of silicon
A jungle in her heart made from concrete, glass and metalMechanical our whore Babylon
