Welcome The Night

Pink Cream 69

[Andi Deris / Alfred Koffler]You're a dream light years ago
Of a world dreams are like I did not know
I did not know
You're a queen scared of your might
Like a shades dying away without light
You fear the nightI know how temperatures rise
I'll heat you out of ice
I know we'll party tonight
So come on baby, do it right
I lift up your disguise
I've known you lightyears ago
Welcome to the nightlife showDance on, on through the night
Never don't forget the light
Don't forget the lightWelcome the night
Welcome the night
We're in love
Welcome the night
Welcome the night
We're in loveI don't need to keep up the ball
You are thawed out for all
I did make your temperature rise
It burns baby through your eyes
I feel your skin next to mine
You're tasting hot and fine
I know we're hot to the core
Wild dancing on the floorDance on, on through the night
Never don't forget the light
Don't forget the lightWelcome the night
Welcome the night
We're in love
Welcome the night
Welcome the night
We're in love
