

Ariel (Instrumental Version)

Stateless

Deep in a bunker underground
There is a voice that makes no sound
Invisible words explode with scorn and
Silently stir up the howling storm
Ariel there was a fire in your house they say
And now your bedroom is all up in flames
There was a fire in your house they say
They say you've been dancing with the devil
You lay the arrow on the string
And throw the sand into the wind
Every grain bursts into flame
And the wind blows it back again
Ariel there was a fire in your house they say
And now your bedroom is all up in flames
There was a fire in your house they say
They say you've been dancing with the devil
